

Company profile

Precast Software Engineering, headquartered in Salzburg, is a leading provider of software and services in the precast concrete industry. Together, the high-performance software solutions, PLANBAR and TIM, offer integrated and model-based precast parts design with visualisation along the entire process. PLANBAR is the comprehensive solution for high-quality, industrialised precast parts design. It offers an efficient CAD design and an ideal synthesis from 2D to 3D. TIM, the Technical Information Manager, serves as an integration tool to network models with third party systems. Thus, TIM facilitates access to data from planned projects, their structure and status in unprecedented detail. The software solutions of Precast Software Engineering guarantee openness towards other systems and support the concept of Open BIM optimally by enabling a lossless exchange of 3D-models. With the services of Customer Excellence Precast attends its customers with change management, training and consulting in system changes and guarantees riskless implementations. Following its guiding principle „from the industry for the industry“ all solutions will be adapted to the individual customer needs. Precast Software Engineering was founded in 2005 and is a 100% part of the Nemetschke Group. For further information, please consult www.precast-software.com.

Managing Director

„One of the present challenges in the precast parts factory is the subject of BIM and data interchange. Where interfaces and various file formats dominate today, we intend to increase the efficiency in the entire process through openness and interoperability“

- Managing Director at Precast since 2010
- Spokesman of the IFC4Precast PG - buildingSMART
- 25 years of industry experience

Werner Maresch, Managing Director Precast Software Engineering GmbH
