Do you show commitment and are you full of ideas?
Then you are in the right place with us!

Precast Software Engineering GmbH is one of the global leading providers of software solutions for the precast concrete industry. We are a wholly-owned subsidiary of the Nemetschek Group (Munich/Germany) and our headquarters are located close to Salzburg (Austria). Due to the high quality and reliability of our systems and services as well as the competence of our employees, the Nemetschek Group has established itself as the market leader. Our software solutions are used in more than 142 countries.

In order to overcome the new *challenges* successfully every day, we need *people* who are full of ideas and keep both feet on the ground. You are *creative, motivated and show commitment*? You can work cooperatively with others, but you are also proactive? You trust your *qualifications* but also your *gut*? Then you fit into our team!

We enlarge our support and consulting team in South East Asia and look for a motivated colleague (f/m) at the earliest possible date:

Civil/construction engineer for technical support in South East Asia

Your tasks:
- As a member of the support and consulting team you support our clients from the precast concrete industry when applying our software solutions
- You implement software at the customers' premises and provide trainings for users. You support our customers via hotline and e-mail.
- You are part of our support and consulting team in our new location (South East Asia)

Your profile:
- Prerequisites for this position are either some years of professional experience in the industry, or experience in a comparable area of responsibility
- You have good written and spoken English and Thai skills
- You are willing to consolidate and deepen your expert knowledge continuously, in order to answer complex questions of precast design and process management in the precast plant
- Customer orientation, excellent communication skills, solution-oriented thinking and action as well as intercultural competence are soft skills that we attach great importance to in this position
- You enjoy frequent travelling

A professional work environment in an internationally active company as well as training and promotion opportunities form the frame of getting started at Precast Software Engineering. We offer performance-based pay and market salaries.
